NO PAPER WITHOUT SKILLED HEALTHY AND SAFE PEOPLE

GUIDE OF GOOD HEALTH & SAFETY PRACTICES IN THE EUROPEAN PAPER INDUSTRY

Bad Münner-HANNOVER
10-11 September 2012
It’s very dangerous to work in a pulp mill or paper, even if the employee is fastened with a standard cable.

The fall-cord has been installed at the request of prevention delegates to prevent accidents caused by the falls that are produced in the operations that requires access to the mills.
• It avoids the fall of the workers for the operations of maintenance that needs the access to the interior of the mill.
• It consists of a rope with automatic brake of stop.
They are installed in the ceiling above the machines, and are fixed at the top of the mill.

The rope anti-falls guarantees that enclosed if the worker loses the control, it’s prevented from falling down.
Before acceding, it’s obligatory to realize the blockade of sources of electricity of the different elements of the mill to assure him on that no equipment should put in functioning, not at least by mistake.
A point of anchorage exists in the surface of the mill, where one anchors the retractable one with his snap hooks.
The extensible tape of retractable one sticks to the dorsal anchorage of the harness.
Once tied the retractable one, the worker goes down the stairs seized and with the put gloves.
When it comes to the base of the mill, the worker is unhooked the harness.
DESCRIPTION: STEP BY STEP

• The worker leaves the snap hook strapped to a mooring point on the inside of mill, and there is no danger of fall once it is in the base.

• Cleaning the mill.

• Releasing the snap hook of the point of mooring.
- It gets to hooking the snap hook to your harness.
- Go up the ladder of the mill.
The workers are whose better know his working place and the labor risks that he carries.

Their opinion, participation and consultation is very important at the moment of implanting preventive measures in the working places to avoid the labor risks.
The participation, communication and involvement is fundamental of all the people to manage and to acquire the "safety culture" in each of the levels the company.
THANK YOU VERY MUCH FOR YOUR ATTENTION
